Best Dressed Girl**

# Locklyn Jace Spence

**Born on Sept 4th @4:27pm  
Birthweight of 4lbs and 1oz**

At 19 weeks baby Locklyn was diagnosed with multi-cystic displastic kidney disease. Due to the diagnosis of Locklyn's condition his mother, Krystal, was put on medical leave from work by the doctors orders. From 22 weeks til 35 weeks Krystal had 22 amnioinfusions. Krystal was admitted into the Medical City Dallas on the 29th of August.

Locklyn was started on peritoneal dialysis but ended up having an emergency surgery to remove the PD catheter and the top part of his colon. This was due to his colon having 3 small holes. Locklyn was then transported to Texas Children's Hospital in Houston, where he has been since September 12th.

**We are raising money to help pay for traveling expenses, rent, and utilities.**

**Locklyn is still currently in Houston for his Hemodialysis.**

**Here's how you can also help!**
